

Brandon Odhiambo Wamboga - Software Developer

Position: Software Developer		
Personnel information	Name: Brandon Odhiambo Wamboga	E-mail: brandonladen486@gmail.com
	Phone: +254 702 499 923	Address: 30100-Eldoret, Kenya
	Gender: Male	Portfolio: brandonodhiambo.onrender.com
	LinkedIn: linkedin.com/in/brandon-odhiambo-40b91a25a	
	Professional qualifications: Cisco Certified: Introduction to Networks (CCNAv7) Cisco Certified: IT Essentials CA Cyber Security Bootcamp - Communications Authority of Kenya Python Certification - Bengo Hub, Kisumu Google Developer Group on Campus Lead Certifications Maseno University Leadership Certifications (three times) Introduction to Digital Labour Platforms Certification	
	Academic qualifications: Bachelor of Science in Information Technology Maseno University, 2021 - 2025 - Second Class Upper Division Software Engineering Programme ALX - Africa (Remote), 2023 - 2024 Software Development Programme Bengo Hub, Kisumu (Remote), 2023 - 2024	
	Technical skills: Languages: Python, JavaScript, Java, C, C++, HTML/CSS Frameworks: Django, React, Node.js, Express.js Databases: MySQL, MongoDB, PostgreSQL, Supabase Tools and platforms: Git and GitHub, Docker, Linux, Prisma, Postman, Swagger Architectures and services: Microservices, Kafka, Dapr, Redis, GraphQL, REST	
	Language proficiency: English: Speaking: Excellent; Reading: Excellent; Writing: Excellent	

	Kiswahili: Speaking: Excellent; Reading: Excellent; Writing: Excellent

Work History

Period	Employing organization and your title/position. Contact info for references	Country	Summary of activities performed relevant to the assignment
October 2025 - Present	Boxraft Title: Software Developer	Kenya	Building internal applications to support company operations. Developing scalable software solutions using modern programming languages and frameworks. Collaborating with cross-functional teams to deliver high-quality software products on time.
May 2025 - October 2025	Safaricom PLC Title: API Engineering Intern, Quality Engineering For references: Victor Kosgei - Safaricom PLC Quality Engineer in Test Tel: 0795 945 242	Kenya	Worked in the API Engineering team under QA to ensure the quality and reliability of Safaricom's API services. Created and maintained automated test scripts for RESTful APIs using tools such as Postman. Participated in regression, performance, and functional testing of internal and public-facing APIs. Validated API responses, error handling, and schema compliance across microservices. Collaborated with developers to troubleshoot issues and provide feedback for continuous integration pipelines.

Period	Employing organization and your title/position. Contact info for references	Country	Summary of activities performed relevant to the assignment
			Documented test cases, test plans, and contributed to QA best practices within the API lifecycle. Learned and applied API design principles, test automation strategies, and enterprise-level QA workflows.
August 2024 - Present	SecretStartups Title: Backend Developer For references: Garron Kramar Tel: +44 7950 346668	United Kingdom (Remote)	Developing and managing microservices using Node.js, MongoDB, Redis, Kafka, and Dapr. Designing APIs, including RESTful and GraphQL, with thorough documentation using Swagger. Implementing robust communication patterns and failover strategies for high reliability in distributed systems.
May 2024 - July 2024	Moi Teaching and Referral Hospital Title: Junior Developer For references: Nixon Manono - MTRH, Eldoret ICT Staff Tel: 0722 210 078	Kenya	Worked as an assistant on the ERP system serving the entire hospital. Supported staff in navigating the ERP and reported technical issues to senior developers for resolution.

Summary of professional experience and project work in reverse chronological order, indicating particular technical experience relevant to software development assignments.

Project	Role	Duration of involvement	Relevant experience
Geo Spatial Village - data mapping solution to determine geographical coordinates of villages, integrated into the Digimal system for planning, monitoring, and resource allocation.	Backend / Mapping Developer	March 2024	Health IT Hackathon 2024: Developed a solution that maps villages to precise latitude and longitude coordinates and visualises them on interactive maps. Enhanced the Digimal system with location intelligence for effective planning, monitoring, and resource allocation. Project secured second position in the hackathon.
Smart Missing Persons Finder - web-based facial recognition platform to help identify missing persons through a centralised database and search interface.	Full-Stack Developer	2024	Personal Project: Built a web application with a user interface and API endpoints that allows the public to submit details of missing persons to a centralised database, and search the database by uploading an image. The system uses open-source image recognition models such as FaceNet from the DeepFace library for identity matching.
CA Cyber Security Bootcamp and Hackathon Series 2023, Kisumu Edition - team-based cybersecurity challenges and innovation showcase.	Team Member	3rd - 4th August 2023	Communications Authority of Kenya: Took part in the CA Cyber Security Bootcamp and Hackathon. Demonstrated practical capability across cybersecurity challenges and contributed to an innovative team solution. The team secured third position in the competition.
Face Progression System for Child Welfare - age-based facial progression	Developer (Team of three)	5th - 7th May 2023	Maseno University HealthIT Hackathon 2023: Built a system that predicts a child's facial progression

Project	Role	Duration of involvement	Relevant experience
tool exposed via an API for use by partner systems.			based on the current age and the age at the time the reference photo was taken, and exposed it through an API key endpoint. The project won the hackathon and was later incubated and incorporated into CPIMS (uonafya).
Distributed Microservices Backend - production microservices architecture with messaging, caching, and service mesh patterns.	Backend Developer	Aug 2024 - Present	SecretStartups (UK): Designed and built microservices using Node.js, MongoDB, Redis, Kafka, and Dapr. Delivered RESTful and GraphQL APIs documented with Swagger, and implemented communication patterns and failover strategies for high reliability across distributed services.
Safaricom API Quality Engineering - automated API testing and QA for enterprise public and internal APIs.	API Engineering Intern, QE	May 2025 - October 2025	Safaricom PLC: Built and maintained automated test scripts for RESTful APIs using Postman. Ran regression, performance, and functional tests against internal and public-facing APIs. Validated responses, error handling, and schema compliance across microservices, and contributed to CI feedback loops with the development teams.

Relevant Coursework

- Computer Networks
- Data Structures and Algorithms
- Fundamentals of Programming
- Object-Oriented Programming
- Database Systems
- Software Engineering

- DevOps
